Assessment Guidelines

Establishing healthy, safe environments for school-age and youth is an essential part of the professional’s role. These environments are a critical component of support children’s development and learning in each area, as well as their well-being. In this assessment, you will develop a handbook for a school-age and youth program that outlines healthy and safe practices, as well as strategies the program includes that are supportive of well-being.

Instructions:

For this assessment, you will be adapting the role of a director of a SAYD program within your community. Create a handbook specific to strategies your program practices that support health, safety, and well-being. Use the following template as a guide to the information you are required to include.

SAY Program Handbook: Introduction

Name of program:

Ages of children served:

Standards, regulations, and guidelines your program follows: (please include the name/s and describe how these apply to/are incorporated within your program).

A brief overview of why support for health, safety, and well-being are essential considerations within SAY environments, including:

- The importance of SAYD developing a positive self-concept.
- Why supporting SAYD self-esteem is a foundation of your program.
- Relevant research (2-3 points with citations that inform your support for SAY development goals).
- How understanding media and media literacy awareness is infused within the program.

Environmental Health and Safety

- A brief description of local, state, and federal regulation guidelines that inform the health and safety needs of SAYD.

Staff Practices

- How program staff demonstrate respect in attitude and practice for racial, ethnic, religious, class, ability, sexuality, and gender diversity.
- How program staff model social and emotional learning competencies in their interactions with SAY and their families.
- How program staff provide support for emotional intelligence and positive conflict resolution.
- Strategies used to support positive SAY competencies in the areas of dietary behaviors, physical activity, risk-taking behaviors, and positive relationships.
- Strategies used to support SAY social and emotional competencies and goal development and realization
- Strategies used to support SAY decision-making regarding media, advertising, and individual situations

Curriculum

- A description of how relevant health and wellness topics for SAY are identified.
- Specific strategies incorporated within the program that are supportive of SAY development of healthy relationships, positive peer interactions, conflict resolution, personal efficacy, and responsibility.
- Activities and strategies that support SAY knowledge and competencies in the areas of identity and physical, social and emotional development.
- How collaborative opportunities responsive to individual efforts, accomplishment, and critical reflection on personal behavior are included within the program.

Environment

- How the program environment is physically and emotionally safe and responsive to SAY needs for health exploration, mental health, learning, and relationship building.
- Ways in which the environment supports social and emotional learning and self-advocacy.

Collaboration with Families

- Practices employed by the program that are supportive of family engagement, collaboration, and positive mental health.
- Strategies that support family participation in goal setting.

Assessment Rubric (pulled from SAYD Master Rubrics)
